1. Operating System Types

are classified into

- Batch OS
- Time-Sharing OS
- Real-Time OS
- Distributed OS

each types uses

OS Structures

Can be

- Monolithic Kernel
- Layered Approach
- Micro Kernel
- Hybrid Kernel

OS Structures implement System calls

provide the base for

System Calls

are used for

- Process Management
- Memory Management
- File System Management
- Device Management

System calls help perform OS functions

OS Functions

- Resource Allocation
- Process Scheduling
- Synchronization & Protection
- I/O Management
- Security

2. Process Management

2. Process Management

* Process Creation
* Scheduling
* Synchronization
* Termination
